

## I Observe . . . I Wonder. . . .

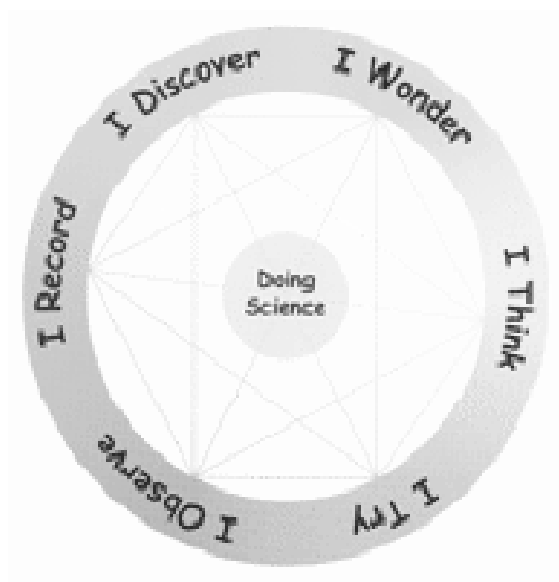

### I Observe:

1. Select an object or organism.
2. Write down as many observations as you can about the object.
3. Now use the magnifying lens to see what new observations you can make.
4. Record the new observations.

### I Wonder:

1. Look over your observations.
2. What do you wonder about?
3. Write some I wonder questions.
4. Can you figure out a way to find an answer to one of your question?
5. Try it and see what happens! Take detailed notes as you investigate.

I Observe . . .

I Wonder . . .
