

# Importing Clips in MovieMaker

**Windows Movie Maker** is software that enables you to use and edit *unitedstreaming* video segments\* and create your own movies.

To import *unitedstreaming* editable video segments in MovieMaker:

1. Log into [www.unitedstreaming.com](http://www.unitedstreaming.com)
2. Locate the video segments you wish to use and download them to a folder on your computer.
3. Open **MovieMaker** and create a new project. Save your project in the same folder as your downloaded video segments.
4. Click **File>** and **Import Into Collections**.
5. From the **Import File** window, select the video segments(s) you want to import.
6. Click **Import**.
