

Streaming KLRN Videos for Previewing

As a best practice **teachers should NOT stream videos for students**. The best way to show a streaming video is to download the entire video or selected clips to the desktop or to the computer's C:drive. Please consult your librarian if you have questions.

Teachers or students (using a student account) may want to stream a video to **preview it before downloading**.

To preview, locate the streaming video then check the **Stand Alone** option in Player Selection. Now click the "Play" button and Windows Media Player will open and stream the video.

If the video is appropriate, download by "Right Clicking" on download then select "Save Target As". Be sure to save to the desktop or the C:drive

To show the video, navigate to the saved file and double click.
