

## TRANSPORTATION MANAGEMENT

CN (R)

To ensure a high degree of safety for persons playing on the campuses and to prevent unnecessary damage to the grounds, no wheeled vehicles or carriers, including bicycles, shall be permitted to operate on any area other than paved or graveled parking areas, streets, roads, and driveways. The only exception to this policy shall be officially approved, District-owned vehicles, or other approved contractors' and workmen's vehicles in execution of District functions.

## TRANSPORTATION EMPLOYEES

The Superintendent shall establish such regulations as shall enable the efficient performance of duties by employees whose assignment requires them to travel to and from various work stations.

The Superintendent may provide a vehicle for the use of any employee when it can be justified that the assignment of a District-owned car will yield the most economical cost to the District.
