

“History Hill” on the grounds of Tejeda Middle School....

History Hill was created with the aim of encouraging our students to experience learning in a ‘hands-on’ environment. This is where they can come to sit inside a genuine teepee while learning all about Native Americans, or sit around a camp fire next to the chuck wagon hearing all about the cattle drives of long ago, Archeological dig boxes, a Roman Garden, an olive orchard and Prehistoric circle are some other centers that are used as beginning points for learning about the past.
