

## Scientist Assignment

- Research and write a summary about famous aquatic scientists and their contributions. Include at least 3 individuals. A list of some is included. Feel free to use any of them or others you find.

You can use the following:

[www.weebly.com](http://www.weebly.com)

[www.smore.com](http://www.smore.com)

[www.prezi.com](http://www.prezi.com)

Google Slides

Google Docs

- Research and **site the websites.**
- Who are they?
- What did they study?
- When did they live?
- Where did they study?
- Major contributions

## Famous Aquatic Scientists

Marine biology deals with the various species of plant and animal life that live in the oceans, seas or in any water body. The classification of the plant and animal species are not based on taxonomy but on the environment. The modern-day marine biologists have taken up the task of mapping the marine species of animals and plants with the help of latest technology. The marine biologists believe they would be able to explore the deep oceanic depressions to find new species of plant and animal life. Here are some of the world-famous marine biologists.

**Adolf Appellöf**

**Samuel Stillman Berry**

**Carl Chun**

**Jacques-Yves Cousteau**

**Anton Dohrn**

**Sylvia Alice Earle**

**Bruno Hofer**

**William Elford Leach**

**Nicholai Nicholaevich Miklukho-Maklai**

**John Murray**

**Harald Rosenthal**

**Georg Sars**

**Ruth Turner**

**Charles Wyville Thompson**

**Alister Clavering Hardy**

**Joseph Ayers**
